

Cool Feet

AIRSPACE FOR LAPTOPS

NO DOUBT ABOUT IT LAPTOPS GET HOT, OFTEN VERY HOT. So hot in fact that manufacturers now prefer the term “portable computer” since you cannot use them on your lap without a risk of injury.

We designed the simplest and most efficient solution to this dilemma. Cool Feet: ultra compact and removable supports for the laptop whenever needed. Fixed with suction cups they are simple to attach and detach, raising the laptop just enough to allow a constant cooling airflow.

PROMOTE YOUR BRAND /

Cool Feet are ideal for reaching the workplace, home, recreational and educational population. Laptop's now represent 40% of professional & home computer sales worldwide and our Cool Feet, as the name suggests are remedial accessories for all hot laptops. They are much appreciated by all users as protection from damage to their laptops, and personal injury.

Accompanying the Cool Feet is a handy pouch, also able to carry your brand & promotional message.

HOW IT WORKS /

Cool Feet attach directly to any laptop with a smooth underneath surface such as an iBook. For non-smooth surfaces, we include four ultra-thin clear adhesive plates to be glued on the underside of laptop to which suction cups will latch tightly, while still remaining easily removable.

To remove, simply pull the small tab then store the feet until required in the provided carrying pouch.
